

Women's S-2 Heated Gloves

With the CORE HEAT Snow gloves from Gerbing's, you can stay as warm as you wish with the simple push of a button. The heat coverage surrounds the hand with warmth extending the entire length of each finger including the thumb. These gloves are also constructed for Hipora® membrane and 100 grams of Thinsulate® insulation that traps the heat and keeps the cold air out.

You will appreciate the water-resistant goatskin leather palms and fingers for maximum feel, dexterity and durability. The pre-curved fit, adjustable non-slip wrist strap and zip-cinch cuffs also make for a great fit.

Includes rechargeable lithium-ion batteries with a built-in microprocessor controller.

⚡ **Power Source:** 7V 2.2Ah Lithium-ion battery

⚡ **Sizes:** XS to 2XL

⚡ **Weight:** 3 lbs./pr

⚡ **Surface Temp:** 135°F

⚡ **Current:** 1.1A

⚡ **Watts:** 7.7W

Zippered pocket on glove gauntlet is made to store battery.

Plug the gloves into the battery and close pocket.

Hold down the power button on battery to turn on gloves. Battery must be plugged in to be turned on!

Regulate temperature by pressing power button once glove is on. Temperature range is 100%-25% going from highest to lowest temperature.

To check the battery's remaining power level unplug battery and hold down power button for 3 seconds and remaining power level will appear. Range is from 25% to 100% with 25% being low and 100% being high.

Buy extra BATLI722R batteries so you can go all day on the highest heat setting!
